

About OncoBeta: Summary

OncoBeta GmbH is an international MedTech company focused on innovative skin-directed therapies for non-melanoma skin cancer. The company develops and commercializes Rhenium-SCT®, a personalized epidermal radionuclide therapy utilizing Rhenium-188 for the treatment of basal and squamous cell carcinomas of the skin. Through clinical research, international collaborations, and real-world evidence programs, OncoBeta aims to advance patient-centred approaches in non-melanoma skin cancer care.
